Still, shopping for the best PC isn't quite as easy as it may sound. When we decided to put this list together, we had to acknowledge that the best PCs strike a balance between price and performance.. That's why the best PCs are still better than smartphones and the that some would say replaced them.. Read the full review: [Best all-in-one PC: Microsoft Surface Studio](#). Pricey proposition for most. The Microsoft Surface Studio is one of the most bougie PCs on the market.. Now, the Special Edition is only available in the US, but our readers in the UK and Australia will still be able to buy the regular Dell XPS Tower and beef it up to the same level through Dell's configuration page.. With the wide range of PC components on the market right now, you can have all the power that you could want.. The rest of my studio is non-Apple pro audio gear ([click to enlarge](#)). Why did you choose this particular Mac setup? It all started with my obsession with all things Mac and my music degree.. Looking quite similar to that old computer that your parents had hidden beneath the desk, this boring exterior belies an exciting array of components.. Inside you'll find your choice of the latest in GPU tech, in addition to a blazing-fast 7th generation Intel CPU and a spacious hard drive and/or SSD.. Feel free to slap in one of the if you want one of the – the are just a 30-minute upgrade away.. Thanks to advances in computer software, it has never been easier to make your own music from home or on the go rather than in a pricey studio. cea114251b [Rhino 6 Mac Download](#)
